About This Game

In the heart of the rainforest, a stunning view opens up to a white limestone city - your city in Tentlan. Travel back to mysterious cultures, become a mighty emperor, and experience the Mayan civilization in your own skin!

Tentlan is a strategy real-time online game played in the times of the pre-Columbian Americas. Starting off with a small settlement in the heart of the rainforest, the players continuously increase their power and influence till they end up developing great empires.

- Individual, cooperative, or competitive gameplay

Build great cities on your own, in a cooperation with other players or tribes, or fight for supremacy against other emperors.

- Multiple researches, mysterious rituals, and powerful units

Extend the knowledge of your civilization through researches, invoke divine influence performing rituals, and prepare great armies for war recruiting different units.

- Control the seasons

Some rituals will allow you to invoke the season effects. Switch from one season to another to take advantage of their effects in decisive moments.

-
- PvP and PvE

Recruit great troops and affront other players, or train yourself while attacking barbarian villages.

- For strategists

In Tentlan, the winners are not those who have more resources or units, but those who know how to play their aces. Develop different strategies and methods of play to irritate your adversaries and attack them unexpectedly.

- Free, no subscription, no catch

Tentlan is free and will always be. The players can acquire some little extras which help maintain the game, but these extras will never be mandatory. We, developers, commit ourselves to making quality games and honest, direct, and sincere communication.

Unexpected downtime + roll back in Muyil:

Hello Ahaus,

We have unfortunately experienced a hardware failure in the server where Muyil resides, and in what is a very rare event our redundancy mechanisms have failed as well, which sadly means we had no option but to "roll back" Muyil to an earlier state.

The downtime took place from 21 Mar 2019 00:05 CET to 21 Mar 2019 15:40 CET approximately.

Muyil is now again accessible as normal, **but its state has been rolled back to 17 Mar 2019 21:09 CET**, that is, about **4 days** before the downtime began. Anything that occurred in between those 4 days has unfortunately been lost. Should you have purchased turquoises during this time, please send us an email to support via support@lionmoon.com and we'll promptly help you recover them.

We are sorry for the inconvenience that this incident may have caused and rest assured that we will take measures to prevent this issue from reoccurring again.

Thank you for your understanding,

Your Tentlan Team
